Chris Zink is a specialist in canine sports medicine and rehabilitation with additional certifications in canine rehabilitation, acupuncture and chiropractic. She is the award-winning author/editor of numerous books and other media on canine sports medicine and rehabilitation. Dr. Zink helped establish the American College of Veterinary Sports Medicine and Rehabilitation as one of the newest specialties in veterinary medicine. Dr. Zink teaches canine sports medicine and rehabilitation to veterinarians, physical therapists, veterinary nurses and dog trainers throughout the world. She was named Outstanding Woman Veterinarian of the Year by the Association for Women Veterinarians Foundation in 2009. As a canine sports competitor, Dr. Zink has put over 100 titles in agility, obedience, rally, conformation, tracking, hunt tests, barn hunts, nosework, and lure coursing on dogs from the sporting, hound, working, terrier and herding groups.

Registration first come first served.

Payment either by cheque to Paws4Fun agility at 53-2640 Draper Ave Ottawa, ON K2H 8V3 or by etransfer (preferred method) to treasurer@paws4funagility.ca Use the question "Where is Chris Zink coming?" and password "paws4fun" or Paypal at the above website under the events tab

What Can you Expect to Learn?

Day 1 Morning

Lecture-Beyond Conformation-Canine Structure and it's importance for performance

-Conformation Myths

*Effects of spaying/neutering on structure and health

*Understanding your dog's physical advantages and disadvantages for performance

*How to evaluate your own dog's structure

*Dewclaws and tails, their use in performance

*How you can use your dog's structure to maximize performance

*How to pick a performance puppy

Working with Dogs

*Dogs' structure will be evaluated in a group setting with the assistance of Chris Zink

Day 1 Afternoon

1. Locomotion

-Gaits (walk, trot, gallop, cantor)-what they look like and how they are used in performance

*How dog gaits differ from horse gaits

*Pacing, crabbing, why they are not ideal gaits and how to retrain

*How to train your dog to gait on cue so as to improve performance and reduce risk of injuries

*The use of ground poles for whole body conditioning

Working with Dogs

*A selection of dogs will have their gait evaluated so that everyone can see a variety of gaits.

*One or two dogs will be used to demonstrate how to train/retrain dogs how to gait at a trot and how to trot poles for conditioning

2. Conditioning the Canine Athlete for Injury Prevention

*The 5 components of a conditioning program for the canine athlete

*Appropriate ages to begin strength and conditioning exercises

*Strength exercises that target specific areas of the body

*How to modify, intensify, frequency, duration during the week and season

*Conditioning for specific muscle groups

Working with Dogs

*All dogs will practice a selection of exercises for flexibility and strengthening of the front, core and rear

Day 2 Morning

Working with Dogs (continued from day 1)

*All dogs will practice a selection of exercises for flexibility and strengthening of the front core and rear

Lecture-Tips and Tricks for Early Detection of Injury

*The importance of early recognition of injuries

*Common causes of injuries

*How to use simple observation tools and training sequences to test your dog's musculoskeletal health

*The most common injuries in canine athletes and what to do about them

*Abundant videos will be shown in slow motion to demonstrate changes in performance that might indicate that the dog is experiencing pain or discomfort

Day 2 Afternoon

Biomechanics of Jumping

*Training jumping from puppies to adults

*Lead legs-what they are, why they are important and how to train your dog to use them appropriately

*Jumping problems-what causes them and how to fix them

Working with Dogs

*All dogs (from 8 weeks to advanced jumpers) will be used at their own level to demonstrate some of the principles of jumping training

*Time permitting there will be a discussion of jumping problems and solutions
